

"A CIO's Legal Compass: Artificial Intelligence, Data Protection and Other Emerging Risks in Hospitality," CIO Summit

Speaking Engagement
September 4, 2025
Vancouver, B.C.

[Greg Duff](#) is a featured speaker at the 2025 [CIO Summit](#), hosted by [Hospitality Upgrade](#) and [HFTP](#). The exclusive summit convenes senior technology executives from across the hospitality sector for discussions on strategy, innovation and leadership.

Greg's session will examine the legal dimensions of technology adoption in hotels. He will address the risk factors tied to AI-driven guest services, data processing frameworks and vendor relationships, as well as contractual risk allocation with cloud providers and service partners. The session will also cover current issues such as junk fee disclosures, guest surveillance and the implications of recent case law for hotel operations.

For more details, visit the CIO Summit [website](#).
