

Discharge Prevention Program: Compliance in NJ

Rutgers, the State University of New Jersey, New Brunswick

May 10, 2017

Event Sponsor: Rutgers NJAES Office of Continuing Professional Education

David A. Roth, a partner in the firm's Environmental Department, will be on the faculty for the seminar "Discharge Prevention Program: Compliance in New Jersey," to be presented on May 10, 2017 from 9:00am – 4:30pm. The program will be held at Holly House on the Rutgers' New Brunswick campus, and is presented by the Rutgers NJAES Office of Continuing Professional Education.

The NJDEP oversees implementation of the Discharges of Petroleum and Other Hazardous Substances (DPHS) rules that impact major facilities throughout the state. As part of these regulations, major facilities are required to prepare, submit and update Discharge Prevention Containment and Countermeasure (DPCC) plans and Discharge Cleanup and Removal (DCR) plans with the NJDEP.

This full-day workshop will cover a comprehensive range of topics related to these discharges and related compliance issues. Mr. Roth will lecture on court decisions related to liability for these discharges under New Jersey's Spill Compensation and Control Act (Spill Act).

Mr. Roth has over 25 years of experience in the representation of companies, businesses and individuals in a wide variety of complex environmental, health and safety matters. He represents owners/operators, generators and other potentially responsible parties (PRPs) in private and government litigation, cost allocation and other proceedings involving the federal CERCLA (Superfund) statute and the New Jersey Spill Act and other state superfund laws, at federal and state hazardous waste disposal and contamination sites throughout the United States.
