

Mission Statement

Our mission is to be the premier law firm concentrating in the representation of businesses in labor relations, employment litigation, employee benefits, business immigration, corporate transactions and commercial litigation.

To fulfill this mission, we continuously strive to satisfy our clients by providing unparalleled service and expertise in these areas. We accomplish our goals by serving in the dual role of lawyers and business advisors who undertake to provide solutions and strategies which demonstrate a clear understanding of each client's unique business needs.

Our attorneys strive to practice their craft on a daily basis in a manner consistent with our Mission Statement. Together, we work diligently to be your most responsive strategic partner and to provide the best service and care for our clients.

In fulfilling our mission, we stress the importance of a preventive approach to employment relations. Whenever possible, we seek to provide non-adversarial solutions that make good business sense. Our goal is to help our clients control costly legal fees that can arise in the context of employment litigation and also to promote positive employee relations. On the other hand, when our clients are faced with employment litigation, we zealously defend their interests in a creative and cost-effective manner.
