## realization & recognition events

---

*MSK Client Alert*

June 8, 2018

ICOs, CVCs, and Hard Forks – a lot of attention has been given to issues surrounding the SEC. MSK has launched a video blog series that will not only dive in to this important topic but also tackle tax, corporate, accounting, and FinCEN issues for both Issuers and Investors, all of which can affect the viability of ICOs today and tomorrow.

In this second video blog, MSK Partner Charles Kolstad discusses Hard Forks and compares realization events to recognition events.
