# cyber, tech, china, and your company

---

Online Event

October 15, 2020

**Su Ross** will be giving a presentation on, "Cyber, Tech, China, and Your Company," as part of **GetGlobal 2020**, which will be held online/virtually. This presentation will take place on Thursday, October 15th at 2:00 PM (PDT).

These past few years have shown how international headlines can be the stuff of everyday anxiety or, for those most flexible, an opportunity for expansion of business. And in no binational corridor is that quite as pronounced right now as between the United States and China. Everything from intellectual property theft, use/abuse of social networks, questions surrounding data collection and the sharing policies of platforms such as TikTok and WeChat, along with workaday cybersecurity concerns, these and many more issues are the constant background hum in the minds of many executives. And now with work from home complicating information security, these phenomena warrant careful and practical examinations and insights. This session will provide an update on these issues, as well as tips to protecting your company and its most vital assets, as we all continue to struggle with the work from home challenges expected to remain on the horizon for some time to come.
