Eric Schwartz is speaking on the panel, "An Overview of Recent Copyright Legislation & The Copyright Claims Court," at the Association of Moving Image Archivist's Copyright Symposium on August 7, 2023.

Archives and copyright remain inextricably linked. As technologies change, copyright continues to evolve through court rulings and legislative changes both nationally and internationally.

AMIA's first Copyright Symposium in brings together stakeholders concerned with where copyright, archives, and access meet. Presented in collaboration with AMIA's Copyright Committee, this online symposium looks at the current copyright landscape and its impact on media archives.

Case studies will examine donor agreements, working with television and advertising collections, the recent Supreme Court decision against The Andy Warhol Foundation, the Internet Archive lawsuit, and more.
