

future-ready firms: leadership perspectives on ai adoption

TAG Alliances Fall 2025 International Conference

Berlin, Germany

October 24, 2025

Andrew Spitzer is speaking on the panel, "Future-Ready Firms: Leadership Perspectives on AI Adoption," at the TAG Alliances Fall 2025 International Conference on October 24, 2025.

About the panel..

As artificial intelligence rapidly transforms the professional services landscape, firm leaders are facing complex decisions around adoption, investment, and implementation. This panel brings together leaders from law and accounting firms who will share their perspectives on how AI is reshaping internal operations, client service, and long-term strategy.

Panelists will explore a range of leadership-level considerations, including financing and ROI of AI tools, training talent, cybersecurity and data integrity, as well as the ethical and regulatory implications of AI use in professional settings. Our open and candid format will also allow us to hear some views of skepticism about AI. This session is designed for firm leaders looking to gain practical insights into how peers are managing both the opportunities and risks of AI, from innovation to governance. Additionally, this session will feature an opportunity for attendees to see and even interact with AI tools.

Topics to be discussed, include:

- Strategic investment and budgeting for AI adoption;
- Workforce readiness and training across departments;
- Ethical and regulatory frameworks for AI use;
- Client expectations and trust in AI-enhanced services; and
- Data security, privacy, and risk mitigation.

Whether your firm is just beginning to explore AI or is actively deploying solutions, this session will offer valuable leadership insights to help you navigate what's next.
