# who's knocking on your computer systems door?

---

Webinar

June 21, 2016  
12:30 PM - 1:30 PM ET

Su Ross will be speaking on cybersecurity hacks on the webinar, "Who's Knocking on Your Computer Systems Door?" hosted by the National Customs Brokers & Forwarders Association of America, Inc. (NCBFFA).

Cybersecurity hacks are not covered by your Errors & Omissions (E&O) policy. Learn what steps you can take to minimize your exposure. All businesses hold a great deal of confidential and proprietary data on their employees, customers, vendors, shipments, and so much more. Your laptop or smart phone is stolen or lost. You don't shred confidential documents. Your IT system gets hacked. There are countless breaches that can occur from within and outside your company. When that happens you do not have to lose your credibility in the marketplace or have the event put you out of business.

Register to hear from experts in the international trade field about important risk prevention measures you can take to protect your data, your employees, your customers, and your business.
