

# The Future of Medical Marijuana in Missouri: Dealing With the Disconnect Between State & Federal Law

## Event

Amundsen Davis, Webcast

September 18, 2018 | 12:00 PM - 1:00 PM CT

Businesses in the cannabis industry operate in an environment of sharply conflicting laws and stringent regulations. Now that Missouri appears poised to join the 30 states (so far) that have implemented medical cannabis programs, nascent Missouri marijuana entrepreneurs need to know what types of regulatory oversight and other legal restrictions to expect.

Join Michael McGrory, a regular cannabis industry presenter and author, on September 18 at noon CT for a discussion of regulatory trend impediments presented by the conflict between federal and state laws. Specifically, he will highlight:

- National legal trends that will impact Missouri's medical cannabis program
- The impact of federal illegality on a state-legal business
- What to expect from the licensing process

**Who should attend?** Cannabis entrepreneurs and their accountants, bankers, insurers, and other service providers.

We hope you can join us!
