

Medical Marijuana Law in Illinois

National Business Institute; Chicago, IL
June 28, 2018 | 9:00 AM - 4:30 PM

Medical marijuana creates numerous opportunities for investors, business owners, health care providers and patients with qualifying conditions. It also creates a myriad of potential legal problems for those who misinterpret state law and fail to take into account the fact that marijuana remains a Schedule I controlled substance under federal law.

The National Business Institute hosts an all-day event, focusing on state and federal laws, as well as business licensing procedures, taxation difficulties, financing pitfalls and more.

Mike McGrory presents two breakout sessions at this event, "Obtaining Medical Marijuana Business Licenses: Overcoming Hurdles" and "Patients, Caregivers and Physicians: Ensuring Legal Compliance."
