

Protecting Data and Your Company: Cybersecurity Update

Illinois Chamber of Commerce; Webinar
March 2, 2017 | 10:30 am - 11:30 am CST

Maintaining your employees' security and information is crucial in this day and age, especially when technology makes the transmittal of information just one click away. The Illinois Chamber of Commerce hosts a webinar, "Protecting Data and Your Company: Cybersecurity Update," where Molly Arranz discusses how companies are being challenged to install processes to protect sensitive and confidential information.

Attendees will learn about challenges, how to implement policies, how to stay on top of current technology, and how to choose the most appropriate data security program for their company. Molly and Colin also cover practices for building and implementing a program that fits the needs of your business.
