

# Corporate Risk Management Series: Strategies to Safeguard Your Business from Cyber Attacks & Data Breaches

## Event

Amundsen Davis, Webcast

December 3, 2025 | 8:30 AM CT

Today's businesses face an expanding threat landscape filled with creative and determined bad actors. Being prepared, managing an incident response, communicating about the investigation and safety of sensitive information, and addressing state and federal reporting requirements can be stressful, complex, and time sensitive. Business leaders—and anyone part of the incident response team—must be prepared to act quickly to mitigate risk, safeguard company assets, and comply with evolving cybersecurity and privacy laws.

Join Molly Arranz, chair of Amundsen Davis's Cybersecurity & Data Privacy Service Group, for a timely presentation on how to respond when a cyber incident occurs. Even if you have a sophisticated understanding of how to react, join us for some insights, suggestions, war stories, and thoughts on how to manage your cyber-hygiene and prepare for responding to an incident.

## Topics will include:

- An overview of your biggest vulnerabilities;
- Building an effective incident response plan;
- Immediate steps to take following a cyber incident; and
- Best practices for mitigating future risk.
