

# How a Properly Worded Waiver & the Right Insurance Can Protect Your Business

Speaking Engagement  
WaiverSign, Webcast  
June 2, 2022

Waivers are an important way for businesses to protect themselves from lawsuits, but they must be done correctly. Finding and using a template waiver, without tailoring it to your work, will not provide any protection at all. It is also important for a waiver to correspond with a business' liability insurance. Join Max Goodman and Sean England from Moreton & Company to learn how to align your waivers and insurance programs.

The webcast will teach you:

- What is a waiver and why should I care about it?
- Why are waivers not drafted specifically for my business likely worthless?
- How do I (affordably) get a waiver that works?
- How do I determine if my insurance program is right for me?
- What are key questions I should ask my insurance agent?

You can view the presentation [here](#).
