

# HR Forum: AI Policies

## Speaking Engagement

Valley Industrial Association (VIA), Webcast  
February 25, 2026 | 9:00 - 10:00 AM CT

From recruiting and performance management to production planning and workforce analytics, AI continues to transform the workplace and our personal lives. As manufacturers increasingly adopt AI tools, clear and well-designed policies are essential to encourage innovation while managing legal and operational risk.

Join Bev Alfon for a timely webcast to learn about the key legal and practical considerations for developing effective AI policies in the modern manufacturing workplace. This session will address employee perspectives on AI use; define its acceptable use for human resources functions; establish training and communication strategies and best practices; and discuss the evolving legal landscape surrounding AI. Attendees will leave with deeper insight and actionable takeaways to develop policies for manufacturers to responsibly leverage AI, support workforce adoption, and minimize risk as technology continues to evolve.
