

Inside Threats to Company Information

Publication

Hoosier Banker

March/April 2022

"In today's day in age, employer's store immense amounts of valuable information, including confidential and proprietary information, on their computer systems, cloud servers or through other online data storage solutions."

The article, "Inside Threats to Company Information," in the March/ April edition of *Hoosier Banker*, refers to a pivotal Supreme Court case regarding computer fraud to help break down the Computer Fraud and Abuse Act (CFAA). It also offers employers suggestions on proper plans, policies and procedures to guard against inside threats.

You can read the full article in the March/ April 2022 edition of *Hoosier Banker*.
