How About the New HIPAA Era: What's New, What's Different, and What's Actually Important

February 5, 2013

Event Sponsor: Blue Plan Legal Department Cooperative 2013

National Teleconference Series

HHS has finally released the final HIPAA/HITECH rules, almost four years from the passage of the HITECH law. There is time to get into compliance, but the rules will affect Blue Plans and their business partners in meaningful ways. This session will focus on what's actually important about these new rules, particularly the key areas where your plans will need to revise behavior, change your strategy or take new kinds of actions. We'll also start to answer your questions about the new rules.

Practice Areas
