

New Wiley Rein Publication Addresses Product Stewardship Challenges

February 20, 2009

In the second of a series of publications addressing environmental issues high on the Obama Administration's agenda, Wiley Rein's Environment & Safety Practice has released a compilation of articles "Addressing Product Stewardship Challenges."

The timely new analysis covers a range of product stewardship topics, including:

- New pressure on manufacturers from the Consumer Product Safety Commission during implementation of the Consumer Product Safety Improvement Act;
- Continued scrutiny from Congress and the Obama Administration;
- The shape of new product stewardship and recycling policy in the U.S.;
- What newspaper recycling tells us about product "life-cycle" stewardship; and
- The most impactful European Union programs in the product stewardship arena.

David Weinberg, chair of the group, commented, "This publication will serve as a resource to help companies and trade associations develop proactive product stewardship policies to deal with the inevitable stewardship regulation they will face in the coming years."

Wiley Rein represents a broad range of trade groups and individual companies to address the myriad challenges that come with implementing stewardship programs, from legal structuring and contracting to transportation and environmental regulatory
