

NSA Cybersecurity Services for Defense Contractors

Wiley Connected

September 15, 2022

Lyn Brown sits down with Kristina Walter, Chief of the Defense Industrial Base Cybersecurity within the National Security Agency's Cybersecurity Collaboration Center, and Ben Kastan who is the Associate General Counsel for Cybersecurity at NSA to discuss an exciting new program NSA has launched to help companies in the defense industrial base combat cyber threats in real time. Do you want to know how NSA can help companies protect DOD information on their networks? Interested in how adversaries target the DIB to steal intellectual property and how NSA can help defense contractors large and small protect the valuable information from cyber threats and ransomware attacks? NSA is offering several cybersecurity services at no cost to any company with a DoD contract and access to DoD information. NSA can also provide defense contractors with real time threat intelligence. Learn more about NSA's services to protect the defense industrial base and the legal basis for them by listening to our new podcast with senior NSA officials.
